Subject: need help

Wayne,

Must be wild there. Thanks for your help. You will never get change out there with that women running uncontroled. What she did was dishonest. And she fights and undermines reforms and morale.

Now a little info. When I was trying to calm Jan down regarding you (she called me for advice on MAST and she started right in on the budget letter issue) she said she was concerned because she did not think you would hire a good person. She went on about how john should have been allowed to stay at water to continue his reforms. I told she was misinformed and that john was backsliding and not willing to stand up to the mabel's of the department. She asked if that was what regina thought and I said yes. Jan appeared to be OK.

The other thing you need to know is she said "Wayne takes so long to pick department directors". So I would suggest you prove her wrong and also put her and cathy on the review committee.

Go Nova.

Steve
